Mathematical Olympiads at Miller

Introduction

The purpose of this program is to provide students with an opportunity to explore and enhance their mathematical problem-solving skills and to compete against students from other schools in a friendly and competitive environment. The Mathematical Olympiads at Miller is a great opportunity for students to challenge themselves and to learn from others who share their interest in mathematics.

Snowman Power

Real For The Sees

Mathematics is a fundamental discipline that is essential for understanding and solving problems in various fields such as science, engineering, and technology. It is a powerful tool that can be used to describe and analyze the world around us. In this program, students will have the opportunity to explore and apply mathematical concepts in a variety of contexts.

Student Teachers at Birlafi School

A special help for special education students

The students who are being trained at Birlafi school are those who have been identified as having learning disabilities. These students require special instruction and accommodations to ensure their success. The school provides a variety of services to support these students, including individualized education plans, modified curricula, and specialized instructional materials. The goal is to help these students reach their full potential and achieve academic success.

Conversation with Kevin's Mom

Kevin's mom is concerned about his progress in school. She has noticed that he struggles with reading and writing, and she is worried that he may be falling behind his classmates. She has spoken with his teacher and the school psychologist, who have discussed possible accommodations and interventions. The mom is committed to supporting her son and ensuring that he receives the help he needs to succeed.

APRIL 1996
Learning about Money

1. I went to the library and asked for a book on money.
2. I read the book and learned about the different types of money.
3. I asked my parents about the money they use.
4. I practiced counting money and using it in real-life situations.
5. I created a budget for my allowance and expenses.
6. I helped my parents balance their checkbook.
7. I saved money for a special purchase.
8. I used money to buy something I wanted.

In the next few weeks, I plan to:

- Learn more about the history of money
- Understand the value of money in different cultures
- Explore alternative forms of payment
- Develop a personal finance plan
- Volunteer at a local bank to learn more about financial services

If We Ran A Zoo

- Create a plan for organizing the zoo
- Design a layout for the different animal enclosures
- Select animals that are compatible and can thrive together
- Plan activities and attractions for visitors
- Establish a budget for the zoo operations
- Develop a marketing strategy to attract visitors
- Monitor the progress of the project and make adjustments as needed
