SAT Method Prep.

There is no single correct way to use the course. The course is designed so that each
student can work on the areas that he or she needs the most practice.

If you are very strong in math but weak in critical reading, you might just skim through the
math lessons but read the critical reading lessons very carefully.
As you become familiar with the course you may find it beneficial to spend more or less
time in certain areas.

GOOD LUCK,

The important things to remember are to have fun, set goals, and stay focused.
